DID YOU KNOW?? 3 million people have dental implants!

TIPS FROM THERAPEUO DENTAL

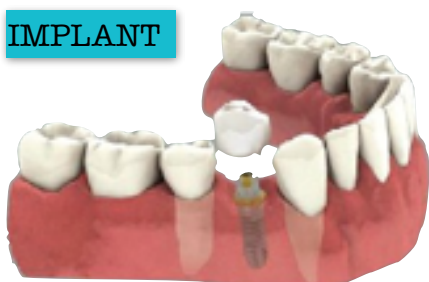

SHOULD I GET AN IMPLANT OR A BRIDGE?

IMPLANT	BRIDGE
---------	--------

- ▶ Does not involve cutting adjacent teeth for support
- ▶ Adjacent teeth if healthy may not require root canals
- ▶ Underlying bone condition must be good
- ▶ Overall systemic health of the patient (diabetes, blood pressure) must be good
- ▶ Total process duration ranges from 4 to 6 months as bone healing is taken into consideration.
- ▶ Surgical procedure for placing the implant is required

- ▶ Involves cutting adjacent teeth for support.
- ▶ Adjacent teeth may require root canals
- ▶ Underlying bone is not taken into consideration
- ▶ Overall health status of the patient is not as restrictive
- ▶ Total process ranges from 1 to 2 weeks.
- ▶ No surgical procedure required if surrounding teeth are healthy.

IMPLANT

BRIDGE

THERAPEUO Transformation of the month

Here is one of the sweetest people we have ever had the opportunity to treat. Mrs. Jeena Thadani who resides in Canada.

She came in to see us and was quite distraught as she did not know whether she would be able to chew her food properly or not.

Well here she is now eating away whatever her heart desires. All is this possible only because of the six implants that were placed replacing her back teeth.

Thank you Jeena for having so much faith in us and we're glad we could help!

BEFORE

AFTER

QUESTIONS PLEASE!

Which tooth brush should i use? - *Harsh Dalmia*

An Excellent question Harsh! You should use a soft or medium bristled brush. Do not use a hard bristled brush as this would cause more damage than anything else. Also you should consider switching to an electric brush for better cleaning efficiency.
